Questions Posed to the Highlands Council  
by Potential Respondents to the Request for Proposals to  
Develop a Regional Interactive  
Environmental Resource Inventory ("ERI")  
February 28, 2019

### Question #1:

We see you have an interactive map on your site. What about this does not fit your needs? What would you like to change?

### Response #1:

We are currently very satisfied with the functionality of our online mapping applications. Our needs, as outlined in the RFP, are different for the Environmental Resource Inventory application than that of our existing applications. The major difference is the need for real-time processing of data, which cannot be accomplished with our current applications. Speed is an issue for the end user with our current hosting environment, and would be compounded by asking any application for real-time processing capabilities. Additionally, the Environmental Resource Inventory application will need to be customized to a degree for each municipality within the Highlands region.

Complete RFP can be found at the link below:
